### **DETAILED ACTION**

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on March 10, 2009 has been entered.
2. Claim 72 has been rejoined.
3. Claims 46, 48-51, 55, 58, and 61-72 are examined on the merits.

### **CLAIM REJECTIONS - 35 USC § 101**

4. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.
5. Claims 46, 48, 55, 62, 64-67, and 72 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.
6. Claims 46, 48, 55, 62, 64-67, and 72 rejected under 35 U.S.C. 101 as not falling within one of the four statutory categories of invention. While the claims recite a series of steps or acts to be performed, a statutory "process" under 35 U.S.C. 101 must (1) be tied to another statutory category (such as a particular apparatus), or (2) transform underlying subject matter (such as an article or material) to a different state or thing. The instant claims neither transform underlying subject matter nor positively tie to another statutory category that accomplishes the claimed method steps, and therefore do not qualify as a statutory process.

### **CONCLUSION**

7. Claims 49, 50, 51, 58, 61, 63, 68-71 allowed. The prior art of record fails to teach or suggest the claimed invention individually or in combination the limitation of where each query-relevant part of the used includes at least one of the one or more keywords and in response to the determination, not adding the second search result to the set of final search results as set forth in claim 49 and 51.
8. The closest prior art of record, Zamir et al., discloses a method of clustering Web search results. Meyerzon et al. (newly cited) describes a method for detecting duplicate documents in Web crawls based on content identifiers. However, neither Zamir or Meyerzon teach or suggest the limitations cited above as being free of any prior art when read in the claims as a whole.
